

HEALTHY FOR LIFE

UV ANGEL ADAPT™

SURFACE PATHOGEN CONTROL

Reducing the Spread of Pathogens with Advanced UV-C Technology

A growing volume of science points to shared workstations as fomites for pathogen transmission. Studies have shown the presence of HAI-related pathogens on 1 in 4 frequently touched surfaces.

Reduce the risk of spreading viruses and bacteria with an intelligent, automated UV-C that safely and continuously detects and neutralizes surface contamination. It's called the UV Angel Adapt™.

High Touch, High Risk

The spread of contamination has become a critical problem in environments from hospitals to corporate offices, retail locations, restaurants, coffee shops, dental clinics, hotels and more.

How it Operates

Using an intelligent, automated UV-C light treatment platform, the UV Angel Adapt™ continuously monitors when surfaces have been used and safely treats them hundreds of times a day with no assistance from staff. The moment a potential threat is detected on surfaces, the UV Angel Adapt™ neutralizes it at a cellular level, at rates greater than 99%.

COMPLETE

BY THE NUMBERS

UV ANGEL ADAPT™ SURFACE PATHOGEN CONTROL

Features

- Effective and Unobtrusive.
- IOT Connectivity Onboard (Wi-Fi & BLE).
- Streams real-time data.
- Accelerometer & Gyro allows for better understanding of the surrounding environment.
- AI Algorithms detects typing and manual cleaning.

UV Angel Adapt™ is manufactured by UV Partners Inc. in Grand Haven, Michigan

Distributed by:

2259 South Sheridan Drive
Muskegon, MI 49442

Pure Protective Equipment offers equipment lines and programs that are focused on total cleaning solutions for facility operations.
